

HOW TO CLEAN YOUR ESTHEC OUTDOOR DECKING

For Allegra and Robusto

1

Remove all loose debris with a soft broom

2

Prepare the cleaning product, dilute **1 part Esthec Green Cleaner 2.0** into **2 parts of water** - 1:2 Ratio. Mix thoroughly.

3

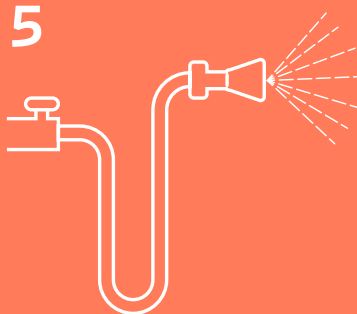

With the help of a pressure sprayer, apply the mixture onto the deck and let it soak for a **few minutes**.

4

The deck can be cleaned with a pressure washer, provided a cleaning attachment for rotary surfaces is used.

5

Spray down the deck with clean water, use a garden hose with a spray nozzle. You can also use the pressure sprayer, but only with a light pressure setting and keep enough distance from the deck otherwise you will damage the surface.

6

Remove excess water from the deck with a squeegee and let the deck dry.

Repeat the above process if necessary. And note that for the best result you shouldn't let the soapy water dry in the sun.

Enjoy your deck.
