

## Esthec® composite decking

Patented, prefab, viscous-elastic composite material with luxurious appearance. Supplied in sheets and in the form of custom-made sections and as decks produced with the use of CNC techniques, but also in the form of solid sections for details like toe rails, rubbing strips, gunwales and steps.

Main characteristics	:	Composite, long life, ecological, lightweight, durable, non-slip.
Application	:	From sloops, ribs, sailing and motor boats to mega yachts.
Thickness	:	5.9 – 6.1 mm
Weight	:	7.5 kg/m <sup>2</sup>
Available principal colours	:	10
Available joint colours	:	5

Esthec® is processed in an ecologically sound manner and is resistant to the most common oils, greases, juices, wines, salts and solvents.

It does not break, crack or splinter, is easy to clean and cost and time saving due to fast installation and low maintenance. Esthec® offers excellent grip in both dry and wet conditions.
